About me

- Jevgenij Dmitirjev, CEO, Founder
UAB "Interaktyvūs sprendimai"
- Working countries Lithuania, Latvia,
Thailand, England, Germany, Austria
- Clients

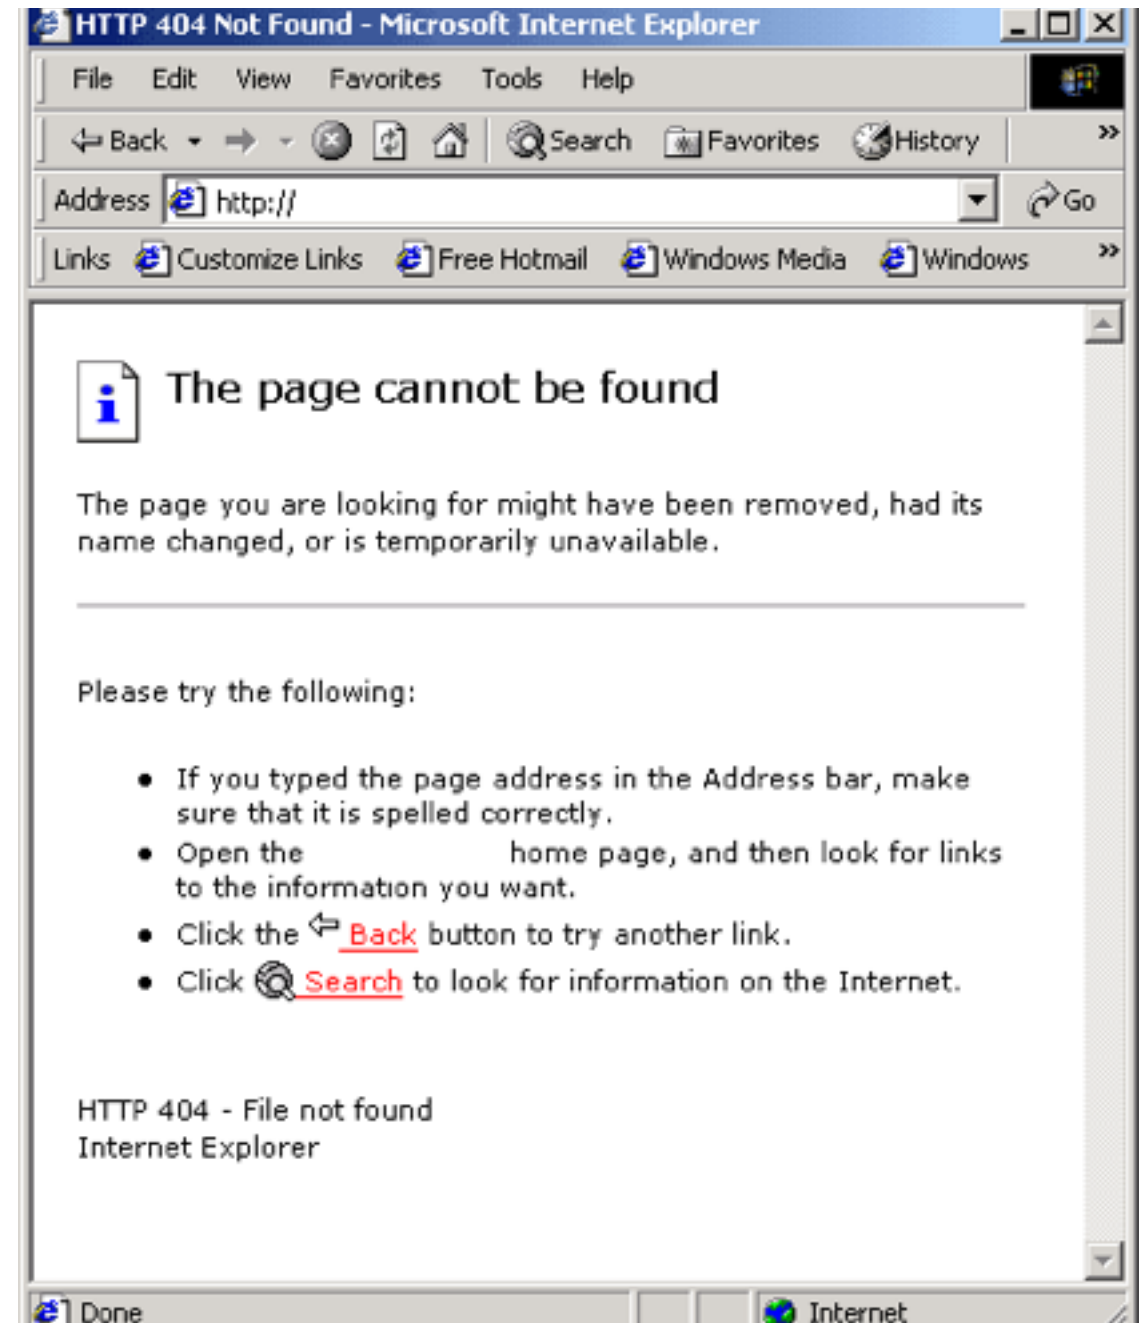

Busch-Jaeger

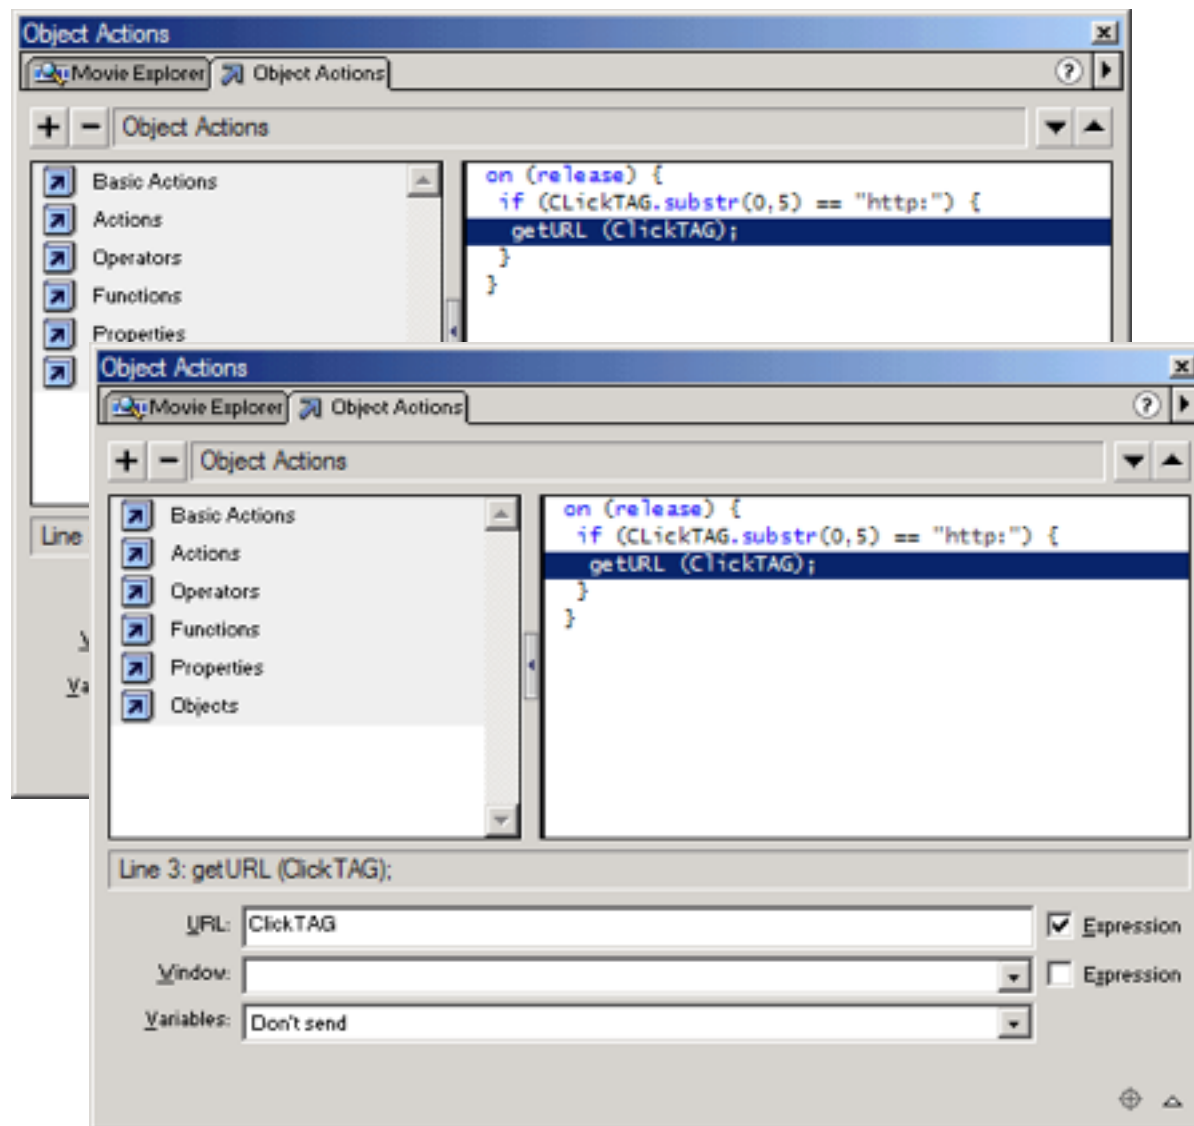

First project

- No internet at home
- Web site
- HTML, CSS only
- IE6 only
- No repository, no version control
- Single purpose code
- Project lost due HDD failure, nothing to remember...

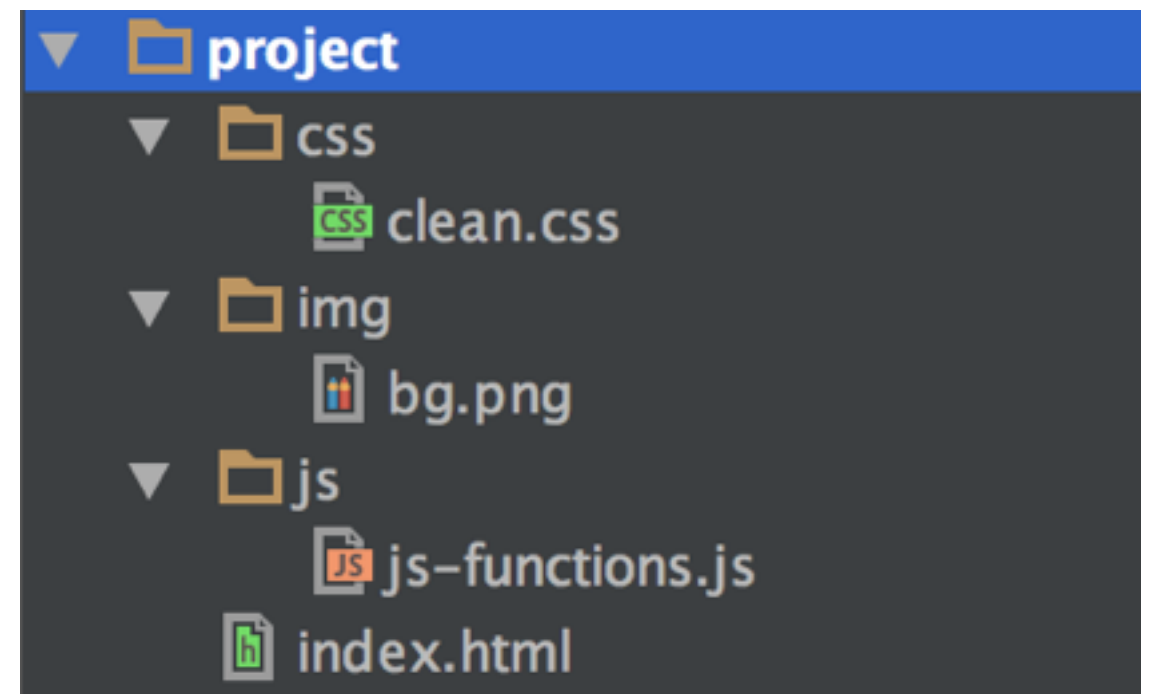

Finding patterns - PART I

- Code snippets
- Copy + Paste

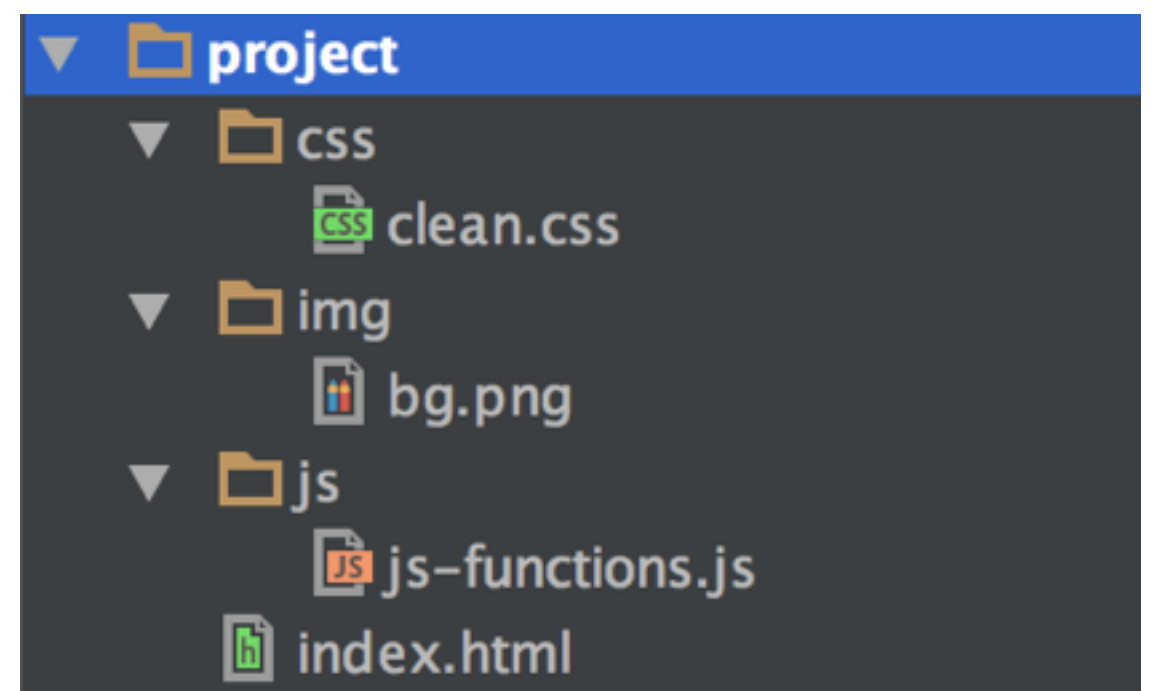

Finding patterns - PART II

- File structure
- Same classes of code
- Copy Paste whole directories

- Complicated updating

Saviour - SVN

- Apache Subversion - grandfather of git
- Initial release **20 October 2000**
- Simplified life
- Was used locally on your PC
- Later used on server
- **svn:externals** aka vendors

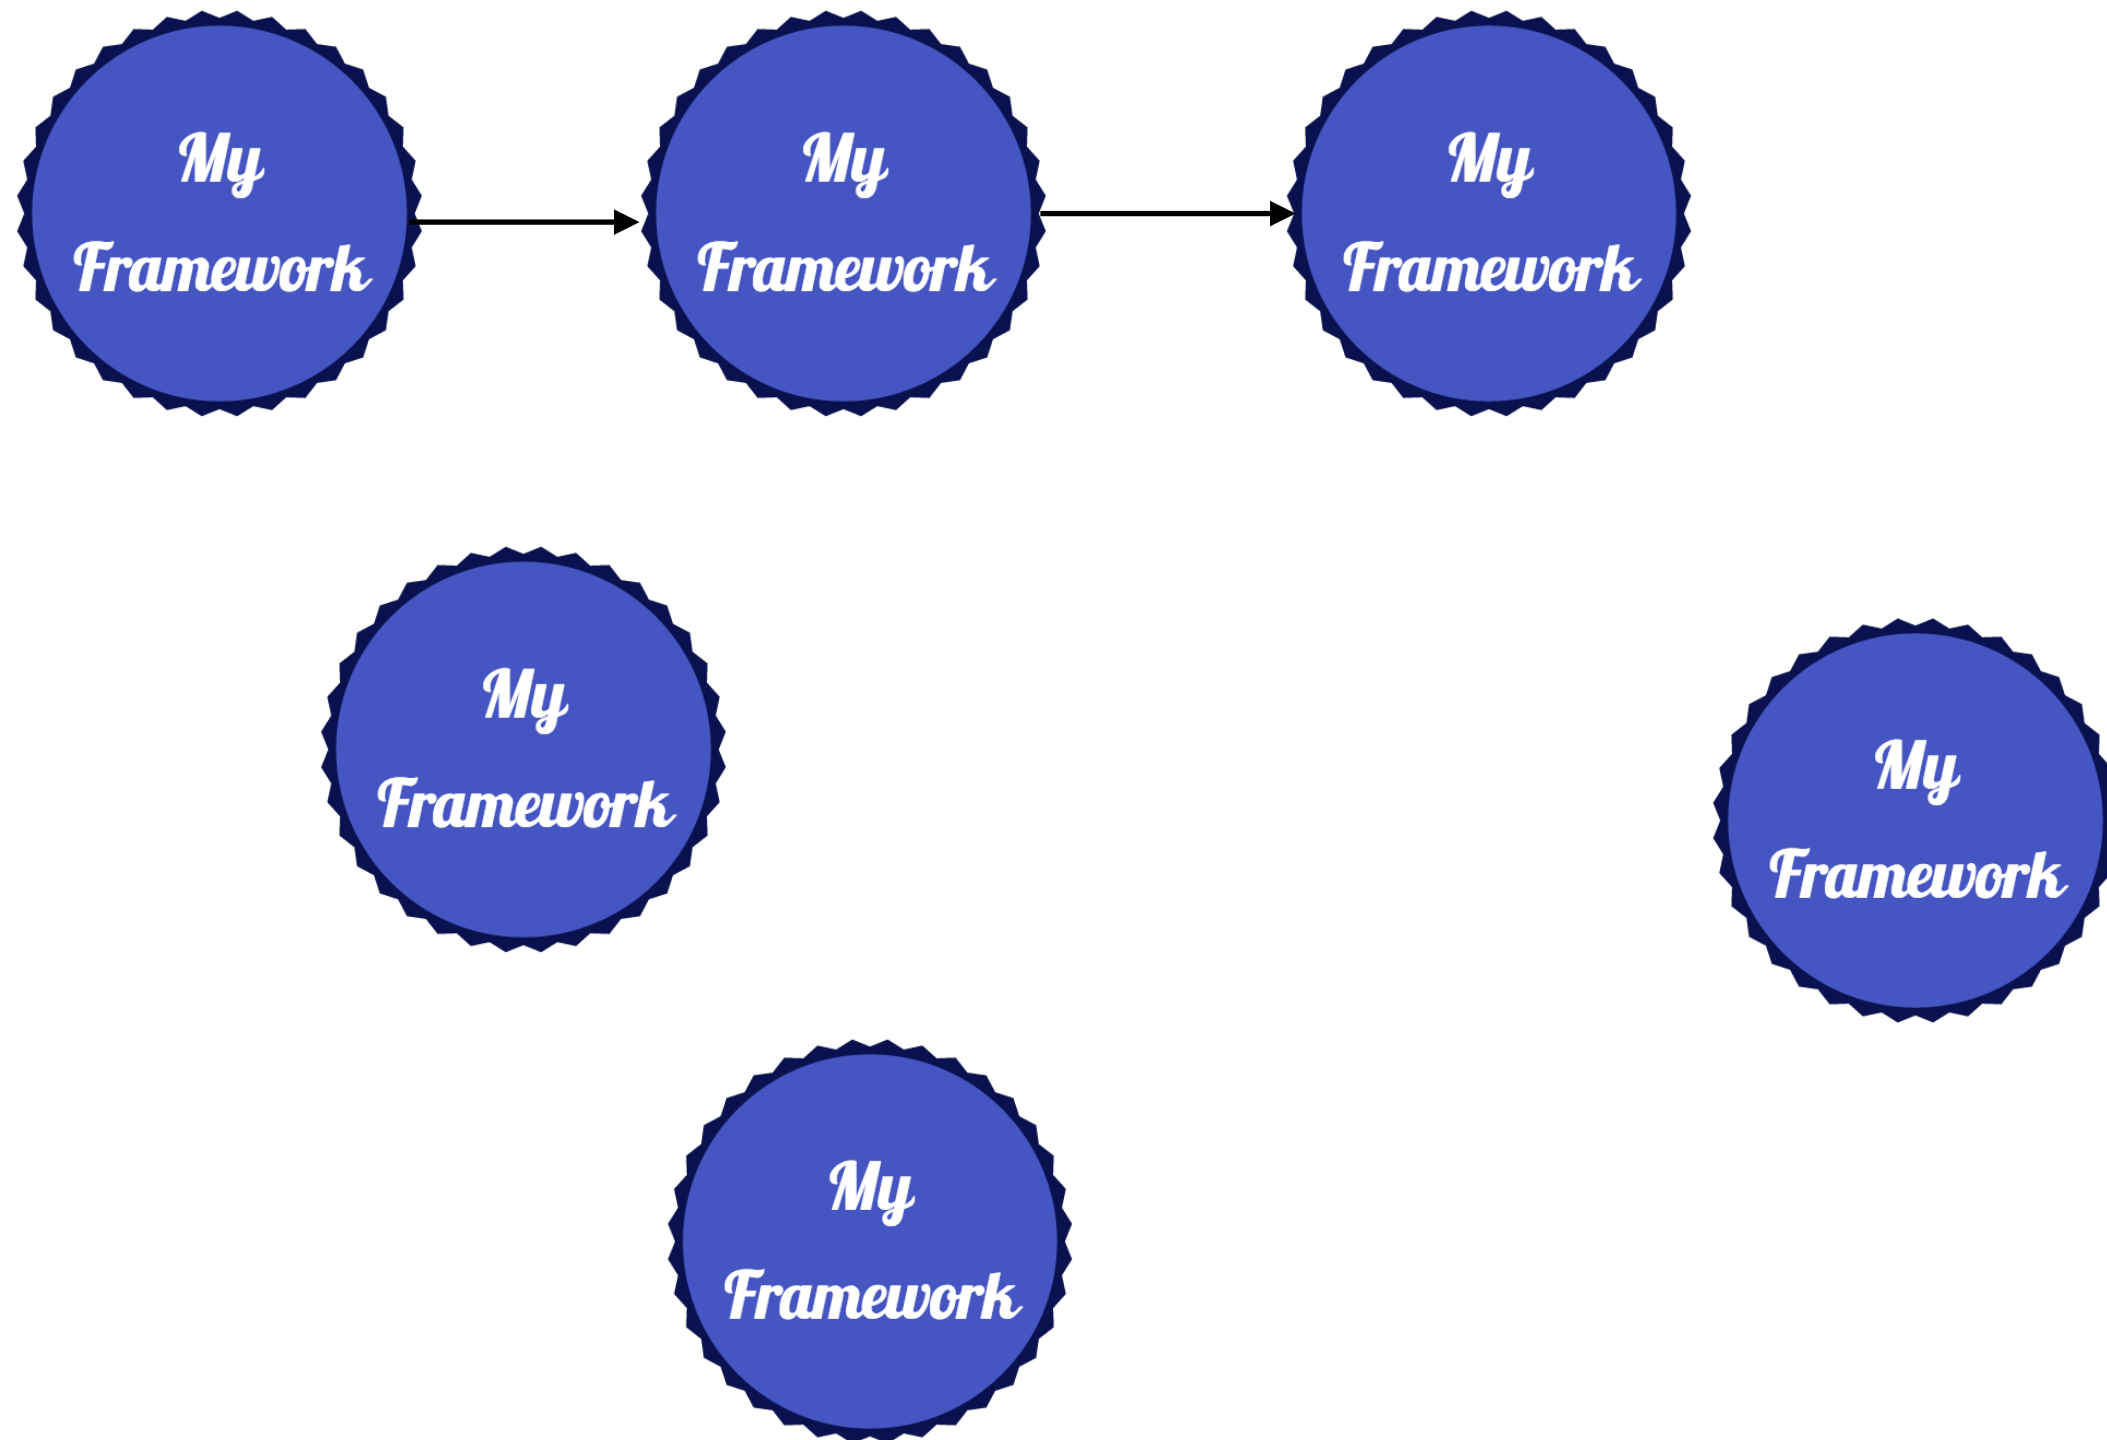

Continuous deployment

- Jenkins and Hudson
- Install on your own server
- Current Envoyer and Forge

after thousands lines of code

For every programming language

If you have strong community

2 things that never goes away

2 things that never goes away

Now What?!!

Choose your path
