# 1. Laravel 5.2.13 - gan svarbus bugfix'as

<https://laravel-news.com/2016/02/laravel-5-2-13-is-released/>

## Laravel 5.2.13 is released

Laravel just announced that v5.2.13 is now released.

This release fixes a bug that can cause `Mail::queue` to send stale view data when using daemon queue workers. This fix has also been back ported to Laravel 4.2, 5.0, and 5.1.

You can get the latest update by running `composer update`.

## Laravel From Scratch

Each year, the Laracasts “Laravel From Scratch” series is refreshed to reflect the latest iteration of the framework. This is the 2016 edition, which uses version 5.2 of the framework.

Are you hoping to level up your toolset? You’ve come to the right place. This series will take you from installing Laravel, all the way up to mastering the essentials of the framework.

## 6. Creating an open source podcast landing page in Laravel [LIVE VIDEO]

<https://www.youtube.com/watch?v=N2gwo66PwD4>

The screenshot displays a YouTube video player interface. The video is titled "Creating an open source podcast landing page in Laravel - #programming #laravel" by Matt Stauffer. The video player shows a live stream with a terminal window displaying code, a Twitch chat window, and a video player. The video has 923 views and was published on 2 Feb 2016. The description reads: "Creating an open source Laravel project to make it easy to create podcast home pages from any RSS feed - Watch live at http://www.twitch.tv/mattstauffer". The video player includes a progress bar at 0:01 / 47:20 and a share button. The right sidebar shows a list of recommended videos, including "Top Ten Vocal Trance Music - 2016", "Part 9 - Migration Basics [How to Build a Blog with Laravel 5 Series]", "[HD] Best Vocal Trance 26", "vim + tmux - OMG!Code", "Amazing Vocal Trance November 2014 / Mix #31 / Paradise", "Laravel 5.2 PHP Build a social network - Setup & Introduction", "Laravel - Blog 1 (Migrations)", "Reviewing Open Source Pull Requests", "Rapid Application Development - From Idea to Prototype in 1:45 with Laravel", "Laravel 5.2 PHP Build a social network - Signup & Login Screen", and "TDD with PHPSpec - Josh Freeman - SA WebDev".

## LARAVEL TIPS 'N TRICKS

### FIRST LARAVEL PACKAGES IN YOUR NEW PROJECT

2016-01-31

[Justas Maziliauskas](#)

[3 Comments](#)

When I start new project, I install these packages all the time.

[Continue reading →](#)

### LARAVEL NOTIFICATIONS

2016-01-31

[Justas Maziliauskas](#)

[0 Comments](#)

#### NOTIFICATION PACKAGE LARAVEL 5

This one is awesome. Painless notifications in your application. How I use it?

In my master blade template I just put notifications printing code:

```
1 | @notification()
```

Then in my controllers I can send notifications to blade views like this:

```
1 | \Notification::success('User Updated Successfully');
```

But... I'm lazy bastard so one secret.

Create file: app/Observers/NotificationsObserver.php

```
1 namespace App\Observers;
2
3 class NotificationsObserver
4 {
5
6     /**
7      * @param $model
8      */
9     public function updated($model)
10     {
11         \Notification::success(class_basename($model) . ' Updated Su
12     }
13 }
```

# 8. Laravel Release Process

<https://laravel-news.com/2016/01/laravel-release-process/>

2017. At that point, another LTS version will be announced. Here is an outline for the release schedule:

## Proposed Release Schedule

June 2015

### 5.1 LTS

Bug fixes until June 2017, and security fixes until June 2018.

December 2015

### Laravel 5.2

General release of 5.2 which includes 6 months of bug fixes, 1 year of security.

June 2016

### Laravel 5.3

6 months of bug fixes, 1 year of security.

December 2016

### Laravel 5.4

6 months of bug fixes, 1 year of security.

June 2017

### Laravel 5.5

The next LTS release. At this point Laravel 5.1 will no longer receive bug fixes, but will continue getting security fixes until June 2018.

Please keep in mind this is just a general guide and versions can change. My hope is this clarifies any confusion around how the release schedule is setup.

# 9. Offtopic: Istorija apie Digital Ocean

<https://murze.be/2016/02/today-digitalocean-lost-our-entire-server/>

## Today DigitalOcean lost our entire server

FEBRUARY 3, 2016

This morning I got a mail from the support department of DigitalOcean, which hosts most sites for my company [Spatie](#). (If you're not familiar with DO-speak, "droplet" is just a synonym for "server")

... I'm reaching out regarding your droplet. Earlier today, our Cloud Operations team was alerted to some performance issues affecting the physical server that hosts your droplet and immediately began investigating. Unfortunately, despite their recovery efforts and a filesystem check of the underlying disks, the damage was serious enough that this droplet was lost and not able to be restored.

While our hypervisors are all fully redundant with RAID arrays, we do not additionally backup customer data (unless the user has enabled backups for the droplet, or taken snapshots of their own) for several reasons. One of the main reasons is data privacy; for this reason, it's expected that each customer will maintain the backup solution that works for their needs and specific situation.

If you did not have a backup or snapshot of the droplet, I'm sorry to let you know that we are not able to recover your data. The droplet's ID and IP address have been saved, so you can rebuild the droplet if you'd like to keep that same IP address (avoiding any DNS changes), or simply destroy the droplet and create a new one.

...

We apologize for this situation; it's obviously a difficult place to be in, and it's not one that we take lightly, or one without having first tried any recovery methods available to us, before having to give you this bad news. We have gone ahead and granted you credit covering three months of this droplet's run rate. We understand this doesn't bring your data back, but we hope it helps as you move forward.

# Laravel darbo skelbimai: full-time ir freelance

# Klausimas: ką turi mokėti Laravel programuotojas?

— — —

- Kiti Frameworkai
- Front-end / back-end
- Susiję dalykai: GIT, Linux, Forge/Envoyer etc.
- Kokia siūloma alga?
- Kokia reikalaujama patirtis?

**Lietuvos full-time skelbimai**

# Skelbimai iš Lietuvos: nr.1

UAB "Inkodus".

Ieškomas kolega PHP programuotojas (-a), kuris (-i) norėtų ir mokėtų kurti:

- interneto svetaines;
- el. parduotuves;
- įvairaus sudėtingumo verslo valdymo sistemas.

Reikalavimai:

Geros PHP/MYSQL žinios;

Patirtis dirbant su PHP frameworks (Laravel);

Patirtis dirbant su atviro kodo turinio valdymo sistemomis.

Privalumai:

HTML5/CSS3 žinios;

Praktinis SASS naudojimas;

jQuery, Angularjs naudojimas;

Foundation ir/ar Bootstrap praktinis naudojimas.

Anglų kalbos mokėjimas;

Krupštumas, atidumas ir darbų išbaigtumas.

Mes jums siūlome:

Nuolatinį darbą patogiam ofise;

Laiku mokamą konkurencingą atlyginimą;

Projektų įvairovę.

**700Eur** atskaičiavus mokesčius

# Skelbimai iš Lietuvos: nr.2

Orakulas šiuo metu ieško **Senior PHP**

**Programuotojo** (-os), galinčio sėkmingai prisidėti prie vieno didžiausių lažybų portalų Lietuvoje vystymo.

## Darbo pobūdis:

Tikslas: [www.orakulas.lt](http://www.orakulas.lt) vystymas naudojant technologijas: PHP, Laravel, Lumen, PHPUnit, Percona Mysql, Big Data, Vue.js, Angular.js, Linux, Git.

## Reikalavimai:

- Puikios PHP bei Mysql žinios;
- Bendra darbo patirtis nuo 4 m.;
- Geros Javascript žinios;
- Gebėjimas projektuoti ir kurti patikimas sistemas;
- Komandinio darbo įgūdžiai.

## Privalumai:

- Laravel/Lumen framework;
- Linux išmanymas;
- Patirtis rašant unit testus, kodo ir užklausų optimizavime, darbe su dideliais duomenų kiekiais;
- **Technologijos: composer, percona, git, bootstrap, jquery, queues, components, vue.js, angular.js, react.js.**

## Mes jums siūlome:

- Atsakingą poziciją vienoje didžiausių lažybų bendrovių Lietuvoje;

- Smagias įmonės šventes, bendrą laisvalaikį bei sporto iniciatyvas kartu su komanda;
- **2000 Eur** neto atlyginimą

**UK full-time skelbimai**

# Skelbimai iš UK nr.1: full-time

Our client - a start-up award-winning company - are looking to hire a Full Stack PHP Web Developer to join their team in London.

## THE ROLE:

The Full Stack PHP Web Developer will have between 1 - 3 years' experience and they will help develop the company's award-winning learning assessment app.

The successful Full Stack PHP Web Developer requires the following skill set:

- OO PHP
- PHP Frameworks - Atleast 1 of the following: Symfony, Zend, Laravel or Codeigniter
- MySQL
- JavaScript
- JavaScript frameworks - the company use React but will consider candidates with jQuery, Angular, Knockout or React
- HTML / CSS

This Full Stack PHP Web Developer is a permanent position, based in London, paying an attractive salary of **£25,000 - £34,000** depending on experience.

# Skelbimai iš UK nr.2: full-time

Multi platform Tech company, Sports betting  
We are looking for a very passionate, enthusiastic and talented Full Stack PHP developer looking for maximum exposure to challenging and rewarding work to join us on this journey.

Responsibilities for the PHP developer

- Write clean, unit-tested code
- Analyse project requirements, wireframes, and APIs (whether internal or external) to propose integration solutions
- Identify bottlenecks, refactor and optimise existing applications
- Assist the wider IT team in managing tasks, time estimates and planning
- Research and share industry trends and innovations
- Strive constantly to improve the health of our applications with forwardthinking code improvements, process refinement, and new ideas

Required experience for the PHP developer

Must have:

- Have 4+ years **OO PHP** development experience
  - Extensive knowledge & experience with server-side application development in PHP particularly **Laravel & Node.JS** ideally
  - In memory datastore experience (**Redis**)
  - Experience with **Linux** systems administration, web server configuration (Apache/Nginx), **MySQL** Enterprise and other common web stack technologies
  - Solid expertise with open web standards technologies, **HTML, CSS (LESS/SCSS)** and automation tools such as **Grunt**
  - Lead projects and successfully delivered **large projects**
- Nice to have for the PHP developer:
- **Mobile and cross platform** experience (mobile web or app development)
  - **Big data** experience

**45000-50000 GBP per annum**

# Skelbimai iš UK nr.3: contractor

PHP Web Developer (Laravel or similar MVC)- Central London - 2 months rolling contract- £400 p/d max

The OO PHP Developer will need to have experience of the following:

- OO PHP programming
- Laravel 4 MVC or similar
- REST API
- JavaScript
- HTML5/ CSS3
- Agile (Scrum)
- TDD/BDD

PHP, Laravel, MVC, REST API, JavaScript, HTML5, CSS3, Agile, BDD, Guzzle, Composer, GIT, London

Beneficial

- Guzzle
- Composer
- GIT
- PostgreSQL
- Behat
- Cucumber
- Bootstrap/ SASS/ LESS

To apply for this urgent PHP Developer contract using Laravel MVC please send you CV via the application process. My client has said the CV's will only be considered with code samples via a Github, Stack Overflow or similar.

- **£350.00 - £400.00 per day**

# Freelance skelbimai

# Freelance skelbimai nr.1

We have a new, existing **Lumen** based application. The application has both back-end and front-end code that should be further developed and maintained.

We are looking for a developer with 2-5 years experience both with PHP and JS technologies.

## **Key Skills:**

- Must understand OOP programming paradigm.
- Must have basic knowledge of Linux operating system.
- Must know working with GIT SCM, Github, and using branches.
- Should know to create proper abstraction, but not over-abstraction.
- Should know to work independently, with JIRA task system.

- Should know about background queue processing with PHP (local/remote).
- Should know building web-service API client components.
- Advantage: understanding of Dependency Injection (PHP).
- Advantage: Bootstrap

**\$14.35/hr Avg Hourly Rate Paid**

# Freelance skelbimai nr.2

Kardigan is a small software development company located in Norway.

**You must be fluent in English and be available on skype.**

At the moment we have 3 projects:

1. We need assistance implementing an API and connecting a vuejs frontend to the API. The application is in mid-development and you will be working closely with project/tech lead and lead developer.
2. Implement new functionality in a Laravel 4.2 "web-shop", the new functionality will require changes from database level to the frontend (jquery and html).
3. A project 3 is expected within the next few weeks. This will be a rather large project that needs finishing on a short timescale. Technologies will be Laravel 5.2 and Vuejs.

Requirements:

Our requirements

- A web developer with at least 3 years experience
- Extensive expericene with the Laravel 5 framework
- Extensive knowledge with frontend development and preferably vuejs experience.
- Knowledge about TDD and integration testing
- You need to be able to communicate fluently in English (or Norwegian or Swedish)
- Non-disclosure contract will be required
- Access to a stable internet connection
- Due to the complexity of the application we will require regular skype calls throughout the project.
- References, please send us a few selected projects you have done.

**\$27.21/hr Avg Hourly Rate Paid**

# Išvados

- Vien Laravel tikrai neužteks
- Front-end yra svarbu
- Kiekvienaime projekte teks mokytis
- Žmogiškos savybės - didelis privalumas

---
